

Wireless Vehicle Detection System

Introducing a new concept in wireless vehicle detection. The inground e-loop replaces traditional wired inductive loops, saving time and money while increasing reliability.

Installation in 3 simple steps

- ① Code in the **e-Loop**
- ② Core bore 89mm hole 70mm deep and secure using flexible mastic
- ③ Calibrate the **e-Loop**... and you're ready to operate in less than 30 minutes.

Save **many** hours of installation time compared to wired loop systems.

Kit Includes

- 1 x e-Loop wireless inground module.
- 1 x single channel transceiver.
- 1 x magnet.

Features

- Dual sensing technology.
- High security 128 bit encryption.
- Quick and easy installation.
- Recesses into driveway.
- Not affected by ground movement.
- 14500 mA battery giving up to 10 years battery life.
- Top access for changing battery.
